INTRODUCING KLEKKTIC

Entering the market at a time where the demand for customised furniture is high, UAE-helmed brand Klekktic has established itself as a high-quality furniture shop with a difference. Allowing customers to choose the upholstery on their item, and have it delivered within 3-4 weeks, speed and quality are key. The designs – created by local artisans – are trend-driven, while the prices are modest for the level of service you receive. Founder, Heba El Habashy, said: “I wanted to create something that was accessible, using the resources we have within the UAE to reduce the supply chain and delivery time.” Removing the middle man from the trade process, Klekktic takes items straight from the manufacturer, meaning there’s a reduction on the environmental impact and cost. The fabric choices are monitored for their quality, with pet-friendly options available. You can view them in person at their Al Quoz showroom or browse on [klekktic.com](https://www.klekktic.com)
